

Steps to Run the test:

- I. Open the git url <https://github.com/naqvi-haider/SentrycCodingChallenge.git>
- II. Using Terminal make a separate folder using mkdir command to save in your local repository
- III. Navigate to the folder you just created using cd command
- IV. Clone the repository using the git url: <https://github.com/naqvi-haider/SentrycCodingChallenge.git> and run the command git clone <https://github.com/naqvi-haider/SentrycCodingChallenge.git> to clone in your local repository
- V. Navigate through the folder created inside your local repository
- VI. Checkout master branch: git checkout origin/master (all the project files are present in the master branch)
- VII. Run the test cases using the command `./node_modules/.bin/cypress open`
